01 OVERALL DATA SUMMARY

DATASET	RECORDS	COLUMNS	CHARTS
cleaned_2yr_Sales_Data_ffltlLt.csv	5000	21	6

SUMMARY

The dataset contains 5,000 records across 21 columns. It contains 10 numerical and 11 categorical column(s). net_revenue decreased from $200,203.48 to $188,180.50, a change of 6.0%. The highest value was $247,709.33 at order_date = 2025-07, while the lowest value was $182,303.93 at order_date = 2024-11. 'North America' has the highest total net_revenue at $1,758,474.93, representing 35.1% of the overall total. 'Middle East & Africa' has the lowest total at $290,766.52. 'Office Supplies' has the highest total net_revenue at $1,487,522.76, representing 29.7% of the overall total. 'Apparel' has the lowest total at $614,811.60. 'Pen Set' has the highest total net_revenue at $261,279.97, representing 5.2% of the overall total. 'Denim Jacket' has the lowest total at $81,972.72. 'Online' has the highest total net_revenue at $2,065,467.05, representing 41.3% of the overall total. 'Wholesale' has the lowest total at $492,301.78. profit ÷ net_revenue × 100 (ratio of totals) is highest for '0%' at 47.70% and lowest for '20%' at 33.80%, a gap of 13.90 percentage points. The simple average across the 5 discount_% groups is 41.11%.

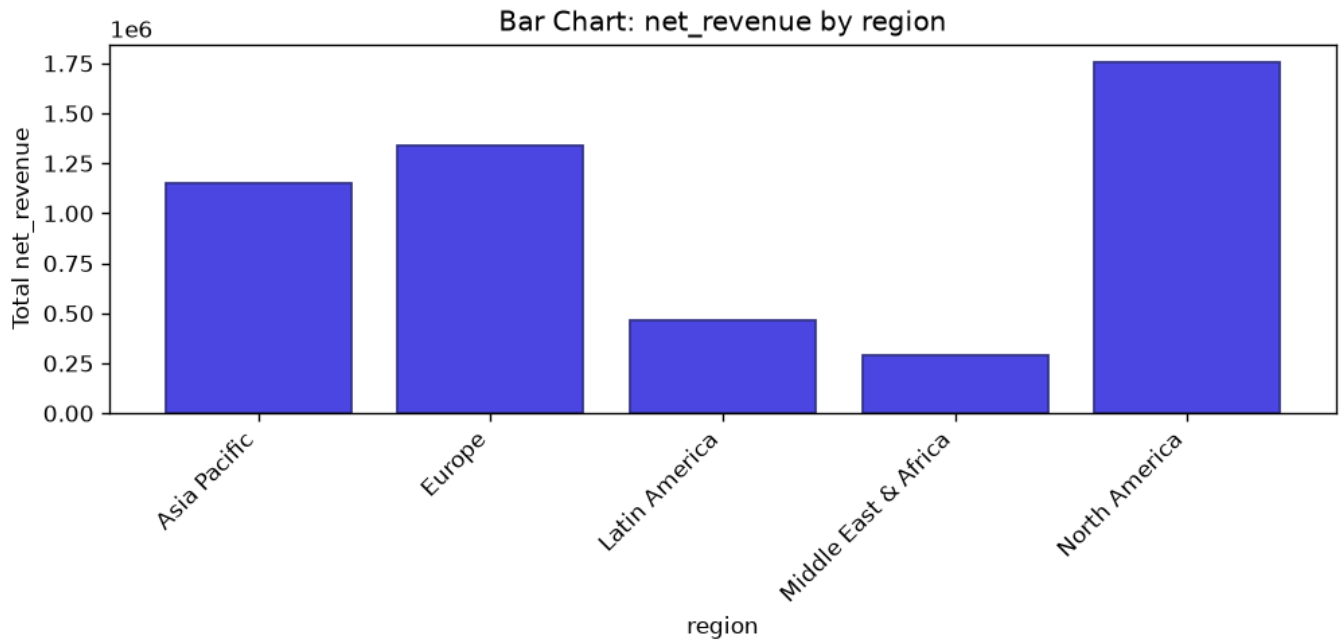

VISUAL #1: ORDER_DATE VS NET_REVENUE

KEY INSIGHTS & FINDINGS

net_revenue decreased from $200,203.48 to $188,180.50, a change of 6.0%. The highest value was $247,709.33 at order_date = 2025-07, while the lowest value was $182,303.93 at order_date = 2024-11.

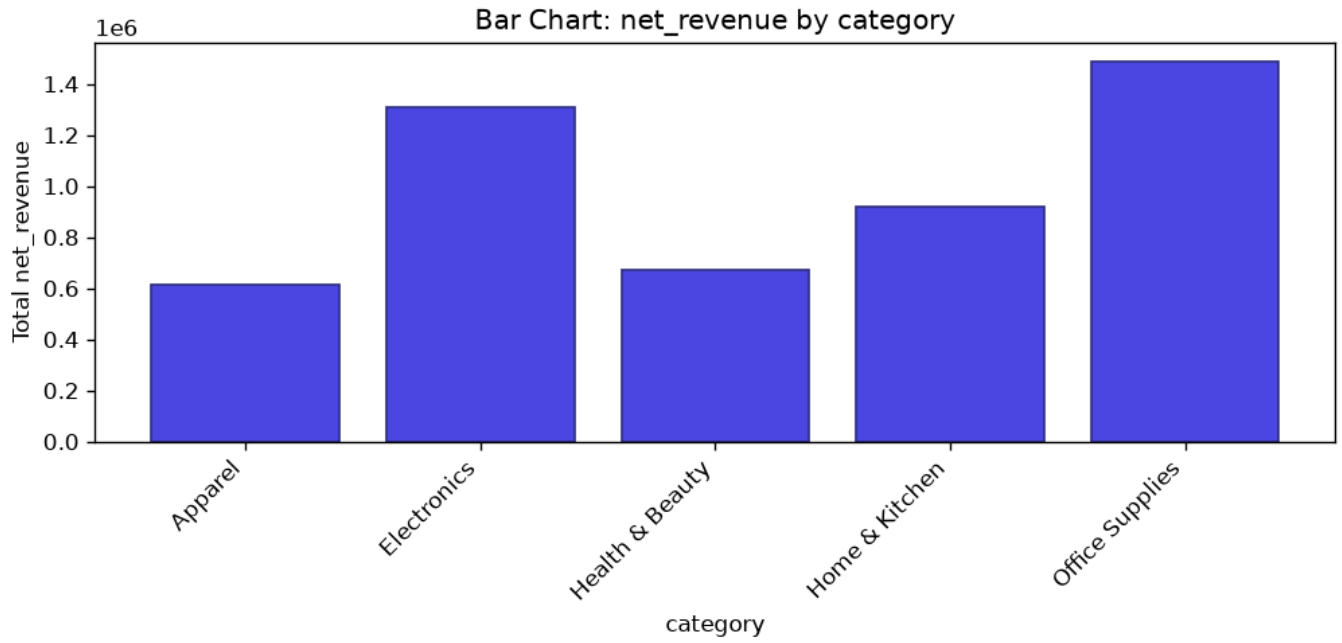

VISUAL #2: REGION VS NET_REVENUE

KEY INSIGHTS & FINDINGS

'North America' has the highest total net_revenue at $1,758,474.93, representing 35.1% of the overall total. 'Middle East & Africa' has the lowest total at $290,766.52.

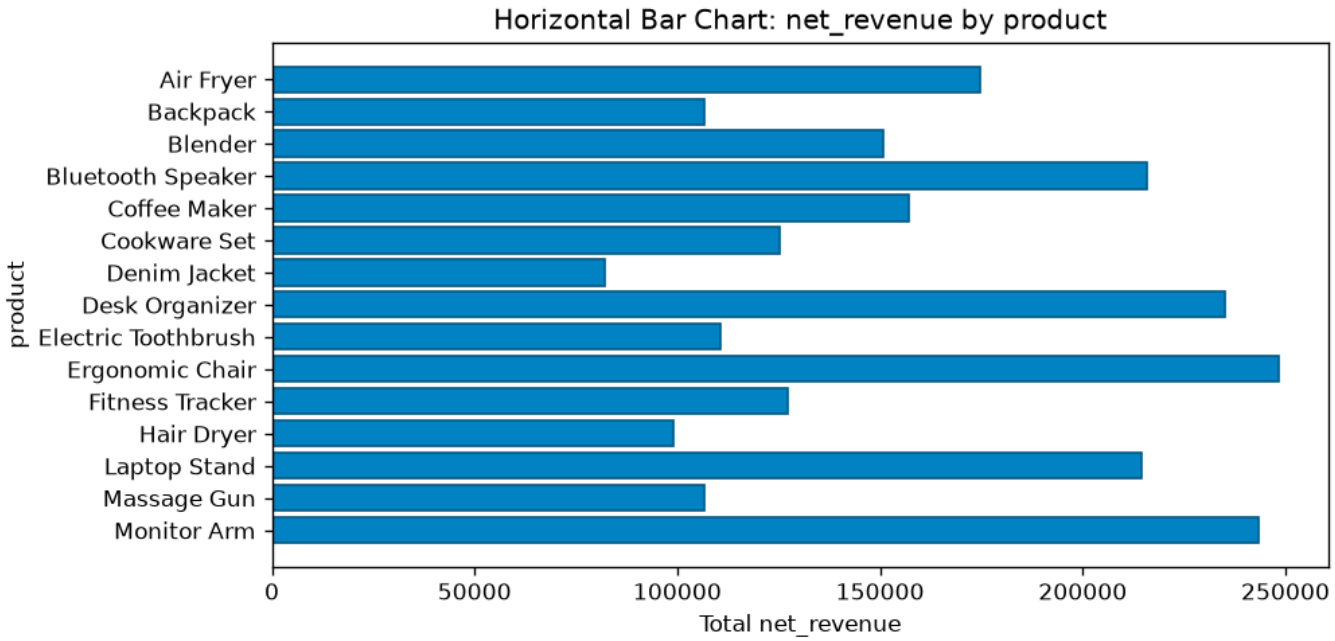

VISUAL #3: CATEGORY VS NET_REVENUE

KEY INSIGHTS & FINDINGS

'Office Supplies' has the highest total net_revenue at $1,487,522.76, representing 29.7% of the overall total. 'Apparel' has the lowest total at $614,811.60.

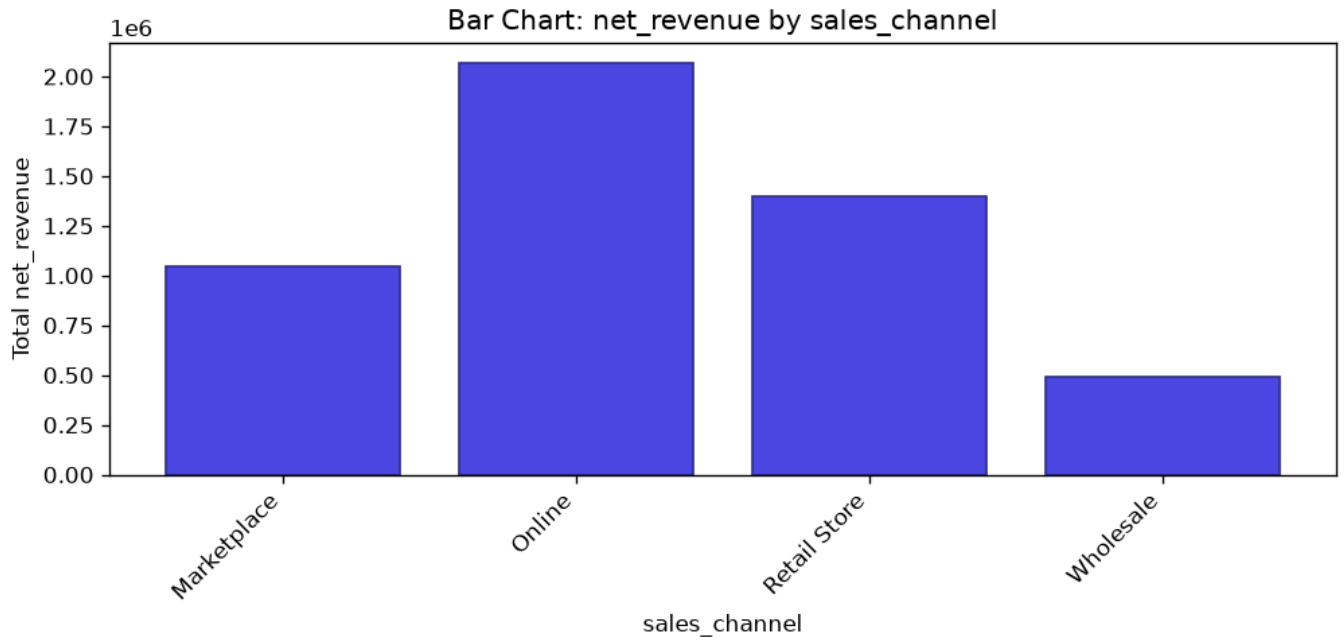

VISUAL #4: PRODUCT VS NET_REVENUE

KEY INSIGHTS & FINDINGS

'Pen Set' has the highest total net_revenue at $261,279.97, representing 5.2% of the overall total. 'Denim Jacket' has the lowest total at $81,972.72.

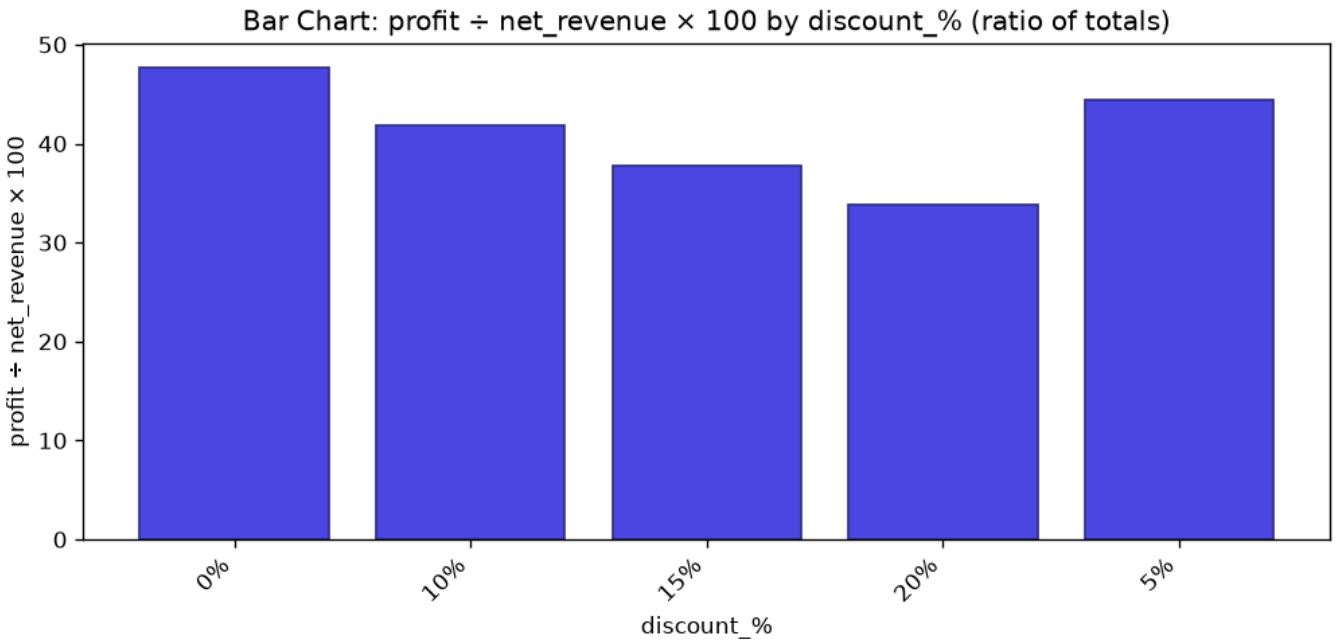

VISUAL #5: SALES_CHANNEL VS NET_REVENUE

KEY INSIGHTS & FINDINGS

'Online' has the highest total net_revenue at $2,065,467.05, representing 41.3% of the overall total. 'Wholesale' has the lowest total at $492,301.78.

VISUAL #6: DISCOUNT_% VS PROFIT ÷ NET_REVENUE × 100

KEY INSIGHTS & FINDINGS

profit ÷ net_revenue × 100 (ratio of totals) is highest for '0%' at 47.70% and lowest for '20%' at 33.80%, a gap of 13.90 percentage points. The simple average across the 5 discount_% groups is 41.11%.

08 RECOMMENDATIONS

Based on the overall dataset analysis and the insights drawn from each chart, the following actions are recommended.

01 **Chart 1 · Line Chart** — net_revenue by order_date

'net_revenue' is fairly stable overall (-6.0% from start to end). Focus on the peak at '2025-07' ($247,709.33) and the low at '2024-11' ($182,303.93) to find what caused them.

02 **Chart 2 · Bar Chart** — net_revenue by region

'North America' is highest and 'Middle East & Africa' is lowest in total 'net_revenue'. Study what separates them and decide whether 'Middle East & Africa' needs attention or 'North America' practices can be replicated. Bars show totals, but groups have very different numbers of records (278 to 1,763). Compare the average 'net_revenue' per record too before deciding which 'region' performs best.

03 **Chart 3 · Bar Chart** — net_revenue by category

'Office Supplies' is highest and 'Apparel' is lowest in total 'net_revenue'. Study what separates them and decide whether 'Apparel' needs attention or 'Office Supplies' practices can be replicated.

04 **Chart 4 · Horizontal Bar Chart** — net_revenue by product

'Pen Set' is highest and 'Denim Jacket' is lowest in total 'net_revenue'. Study what separates them and decide whether 'Denim Jacket' needs attention or 'Pen Set' practices can be replicated. The chart shows only 15 of 30 'product' categories. Filter or group the rest so important categories are not left out.

05 **Chart 5 · Bar Chart** — net_revenue by sales_channel

'Online' makes up 41% of the total 'net_revenue'. Look into what drives this concentration and whether relying so heavily on one sales_channel value is a risk. Bars show totals, but groups have very different numbers of records (510 to 2,058). Compare the average 'net_revenue' per record too before deciding which 'sales_channel' performs best.

06 **Chart 6 · Bar Chart** — profit ÷ net_revenue × 100 by discount_%

The widest difference in this chart is between '0%' (47.70%) and '20%' (33.80%). Find out what drives that gap before acting on the average (41.11%). This chart uses the ratio of totals. Use the same method when comparing with other reports so the figures stay comparable.
